Mid-Level Security Specialist

Description

A security specialist uses their knowledge of physical and personnel security protocols, systems, regulations, etc. to maintain the organization's personnel security systems, automated security systems and employee identification systems. The mid-level security specialist applies expertise on multiple complex work assignments which may be broad in nature, requiring originality and innovation in determining how to accomplish tasks

Responsibilities

- Operates with appreciable latitude in developing methodology and presenting solutions to problems
- Contributes to deliverables and performance metrics where applicable. Expected to work independently or under some supervision
- Serves as the point of contact for personnel and facility security system-related issues
- Provides training to employees on use and features of security systems
- Develops and provides annual security training to company, subcontractor, and project personnel
- Develops and enforces security procedures and regulations

Qualifications

- Bachelor's degree
- Has domain and expert technical or other relevant knowledge
- Can work independently and as part of a team of his/her peers
- Comfortable presenting to diverse audiences including technical and non-technical experts and peers

Preferred Experience

The ideal candidate should have the following experience:

- Direct experience with NISPOM and associated personnel security systems
- Experience with accreditation of secure areas with specific customer relationships

Falcon ExoDynamics believes in the diversity of teams and experiences. We are proud to be an Equal Opportunity/Affirmative Action Employer. We encourage veterans, disabled veterans and disabled individuals to apply for any open position for which they feel they are qualified.
